V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. STATEMENT**

Novelty (N)	Claims <u>1-35</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-35</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-35</u>	YES
	Claims <u>NONE</u>	NO

2. CITATIONS AND EXPLANATIONS

Claims 1-35 meet the criteria set out in PCT Article 33(2)-(4), because the prior art does not teach or fairly suggest a network overlay geolocation system operating in a host wireless communication system with repeaters where the geolocation system determines if signals being received by the geolocation system arrive directly from a target mobile appliance or if the signals are passing through a repeater and therefore are subject to a known time delay. Closest prior art of record, specifically, Durant et al (US 6,501,955 & US 2002/0155838) as well as newly cited art, Riley et al (US 2003/0054813) and Baker et al (2003/0220075) do disclose location determining means utilizing specific repeater signaling techniques where the mobile terminals can be located even if the base station or switching station are not aware that mobile is communicating via the repeater. However, neither Durant et al, Riley et al or Baker et al meet the criteria as X references under pct rules due the their publications dates.
